Chinmay Raichur

Chicago, IL (Open to relocate) | (631) 739-7779 | chinmayrraichur95@gmail.com | LinkedIn | GitHub | Portfolio

TECHNICAL SKILLS

- Languages: Java, C++, PHP, C#, JavaScript, Typescript, SQL, Bash
- Frameworks & Web Technologies: Spring Boot, Node.js, Express.js, React, REST APIs, GraphQL
- Databases & Search: MySQL (AWS Aurora RDS), Redis, MongoDB, Apache Kafka
- Cloud Platforms: AWS (S3, SNS, SQS, EC2, Elastic Beanstalk, CloudFormation, IAM, Secrets Manager, ECR), Azure (Cognitive Services, LUIS, Bot Framework)
- DevOps & Infrastructure: Docker, Kubernetes, GitHub Actions, Jenkins, Maven, Linux/Unix, ELK Stack
- Development Tools & Practices: Git, Postman, TDD, Unit Testing, Integration Testing, CI/CD, Microservices, Design Patterns
- AI/GenAI Tools: Azure Cognitive Services, Conversational AI, NLP Chatbots, GitHub Copilot, AI-assisted development
- Methodologies: Agile (Scrum, Kanban)

EXPERIENCE

Trading Technologies International, Inc.

Software Engineer — ***Chicago, IL* | Jul 2024 – Present**

- Led the design and implementation of an **S3** ingestion system with UI-driven configuration for 100K+ users, improving security by 50% and reducing costs by 70%.
- Enhanced Customer Portal UX for 80K+ users with new navigation and **RBAC**, boosting engagement 40% using **JavaScript.**
- Designed a centralized **Risk API** validation subsystem with 100+ unit tests, reducing support tickets by 80% through accurate error messaging.
- Integrated **SQS/SNS** into the ingestion workflow, improving reliability by 40% across async microservices.
- Delivered cross-region authentication routing using **CloudFormation**, enabling low-latency and fault-tolerant failover.
- Built multi-region **AWS** infrastructure and **CI/CD** for a containerized **Rust** service using **Python** & **GitHub Actions**, cutting production deployment times by 90% and improving release reliability.
- Optimized **SQL** queries for highly available **AWS Aurora RDS** by 60% to support ad-hoc reporting and cross service validation.
- Leveraged **AI**-assisted development tools (**GitHub Copilot**) to accelerate feature delivery and improve code quality.
- Secured data pipelines and APIs using JWT, **RBAC**, and AWS Secrets Manager to protect sensitive partner and trading data.
- Mentored a software engineering intern through code reviews, Agile development practices, and cloud deployment workflows on AWS.

Software Engineer Intern — ***Chicago, IL* | Jun 2023 – Aug 2023**

- Spearheaded a secure **NodeJS** library to integrate **AWS Secrets Manager**, eliminating static credentials and reducing config errors by 60%.
- Containerized and deployed messaging **microservices** with **Docker** and CI/CD, cutting deployment times by 75%.
- Diagnosed and stabilized real-time **WebSocket** stability issues using Postman and API tooling.
- Built **Nginx** load-balanced gateways with advanced caching, improving request throughput.

Stony Brook University

Graduate Teaching Assistant — ***Stony Brook, NY* | Jan 2023 – May 2023**

- Facilitated instruction and evaluation of core data structures and algorithms (**C++**) for an undergraduate class of 120 students in ESE 344.
- Conducted office hours, graded assignments and exams, and helped design coursework to evaluate problem-solving and algorithmic thinking.

Accenture Solutions Pvt Ltd

Senior Software Engineer — ***Mumbai, IN* | Nov 2020 – Oct 2021**

- Optimized tax and invoice processing for 8.2M users using **Java** design patterns and **SQL**, improving performance by 40%.
- Improved invoice processing efficiency by 30% through SQL query optimization and **Java** enhancements, aligning with SDLC best practices.
- Developed **REST APIs** in **Spring Boot**, adopting a Test-Driven Development (TDD) approach with over 90% test coverage.
- Designed, trained, and deployed a scalable conversational **AI** chatbot using **Azure** Cognitive Services (**LUIS**) and Microsoft Bot Framework, implementing **NLP**-based intent classification, entity extraction, and sentiment analysis across 25+ intents and entities, automating workflows for a **C#** enterprise application serving **28K+** users.
- Developed an **AI**-driven FAQ chatbot prototype adopted as the foundation for Accenture's internal employee support automation bot, integrating conversational **NLP** capabilities to streamline employee query resolution and demonstrate enterprise chatbot adoption.
- Recognized with the "Duke Marvels" award for exceptional Agile practices, code reviews, and leadership during senior members' absence.

Software Engineer — ***Mumbai, IN* | Jan 2019 – Oct 2020**

- Optimized **Java** Spring Batch jobs via **SQL** query tuning and batching strategies, improving performance by 60% and saving 40 hours/week.
- Developed reusable **Java** modules for invoice validation and status tracking, improving maintainability across services.
- Created technical documentation and data-flow diagrams, reducing recurring production issues and support tickets by 45%.

EDUCATION

SUNY Stony Brook (Stony Brook University), Stony Brook, NY — ***Aug 2022 – May 2024***

Master of Science in Computer Engineering — ***GPA: 3.9/ 4.0***

Dwarkadas J. Sanghvi College of Engineering, University of Mumbai, Mumbai, India — ***Aug 2014 – Jun 2018***

Bachelor of Engineering in Electronics Engineering — ***GPA: 7.82/ 10.0***
